Clarke's Analysis of Drugs and Poisons is the definitive source of analytical data for drugs and poisons. This reference work has been completely revised and updated for the new edition, and comprises two volumes. Volume 1 has been greatly expanded from 31 to 44 chapters, providing extensive coverage of all methodology and analytical techniques. Of significant interest: Quality control and assessment - separated into two chapters to reflect the differing situations of the toxicology laboratory versus the pharmaceutical industry accreditation with ISO17025 becoming the international standard.
